Introduction

What is wildlife	science and	l management?
------------------	-------------	---------------

Seeking truth

Uncertainty

Environmental variation

Linguistic uncertainty

Partial observability

Partial controllability

Structural uncertainty

Opening the Gates of Management and Science
Openness to diversity of knowledge
Open engagement of social actors
Open data
Open source software
Open hardware
Open evaluation
Open science infrastructures
Open educational resources
Basics of Management/Decision Science
Value of Information
Evidence
PrOACT
Management Strategy Evaluation
Adaptive Resource Management
Causation and Inference

Asking the right questions in the right way

Estimation questions

Hypothesis driven research

Exploratory research

Causation and correlation

Observational Studies
Directed Acyclic Graphs (DAGs)
Confounding variables
Mediator and moderating variables
Basics of Robust Experimental Design
Repetition
Replication
Randomization
Controls
Blocking
Response variables (i.e., performance measures in a decision context)
Basics of Sampling
Probability vs. Non-probability sampling
Defining the population, sampling frame, sampling unit, etc.
Simple random sampling
Stratified random sampling
Systematic sampling

Sufficient causation

Necessary causation

Manipulative Experiments

The Publication and Peer Review Process

Determining coauthorship	
Choosing the best outlet	
Who should review your manuscript?	
How to constructively provide feedback as a reviewer?	
Responding to reviews	
Marketing your manuscript after acceptance
